

門框成型機

Model//CHJ-D-307

傳統使用之門框為木質(不防火, 不易腐蝕)或鑄鋼(不防火, 不易腐蝕), 本公司研發之門框成型機, 專門生產金屬門框, 取代傳統, 兼具防火、防腐蝕、防盜等多項功能。

The traditional door frames are usually made of wood (not fire-proof and anti-corrosive) or plastic steel (not fire-proof but anti-corrosive). However, the door frame forming machine researched and developed by our company can produce metal door frames with multi-functions such as fire proof, anti-corrosion, anti-burglar, etc.

DOOR FRAME FORMING MACHINE

● Model//CHJ-E-02

● 料架

Light weight single head material uncoiler

鐵板厚度	1.2~1.8mm
成型速度	12~20m PER MINUTE
輪模軸徑	φ60mm
輪模組數	20~26
動力馬達	25hp~30hp
全長X全寬	L 8M W 12M
單頭放料架載重	3.5Ton
